On December 27, 2006, the Peruvian Government eliminated the tariffs on 2,894 products, most of which are capital goods. Why? There are 50,000 companies in Peru that need to purchase machinery to increase production and improve the quality of their final products. The sectors that will benefit from this measure include: Mining, Construction, Textile, Transportation, and Information Technology. Additional key export markets in Peru include: pharmaceuticals and plastics/resins.

Peru's GDP grew 7.5% in 2006 and is expected to maintain or increase this rate in 2007. This could not be a better time for your company to explore opportunities for doing business in Peru.

No charge, but reservations are requested. Please contact:
